23. Public Opening of Financial Proposals

23.1 Unsuccessful Proposals

After the technical evaluation is completed, the Procuring Entity shall notify those Consultants whose Proposals were considered non-responsive to the RFP and TOR or did not meet the minimum qualifying technical score, advising them the following: (i) their Proposal was not responsive to the RFP and TOR or did not meet the minimum qualifying technical score; (ii) provide information relating to the Consultant's overall technical score, as well as scores obtained for each criterion and sub-criterion; (iii) their Financial Proposals will be returned unopened after completing the selection process and Contract signing; and (iv) notify them of the date, time and location of the public opening of the Financial Proposals and invite them to attend.

23.2 Financial Proposals for QBS, CQS and SSS

Only the Financial Proposal of the technically top-ranked Consultant is opened by the opening committee. All other Financial Proposals shall be returned unopened after the Contract negotiations are successfully concluded and the Contract is signed with the successful Consultant.

When the selection is based on the SSS method and if the invited Consultant meets the minimum technical score required passing, the financial proposal shall be opened and the Consultant invited to negotiate the contract.

23.3 Financial Proposals for QCBS, FBS, LCS

Following the ranking of the Technical Proposals, and after internal approvals, the Procuring Entity shall simultaneously notify in writing those Consultants whose Proposals were considered responsive to the RFP and TOR, and that have achieved the minimum qualifying technical score, advising them the following: (i) their Proposal was responsive to the RFP and TOR and met the minimum qualifying technical score; (ii) provide information relating to the Consultant's overall technical score, as well as scores obtained for each criterion and sub-criterion; (iii) their Financial Proposal will be opened at the public opening of Financial Proposals; and (iv) notify them of the date, time and location of the public opening and invite them for the opening of the Financial Proposals.

23.4 Opening of Financial Proposals

The opening date should allow the Consultants sufficient time to decide for attending the opening and shall

be no less than five (5) Business Days from the date of notification of the results of the technical evaluation, described in ITC 22.1 and 22.2.

The Consultant's attendance at the opening of the Financial Proposals (in person, or online if such option is indicated in the Data Sheet) is optional and is at the Consultant's choice.

The Financial Proposals shall be opened publicly by the Procuring Entity's opening committee in the presence of the representatives of the Consultants and anyone else who chooses to attend. Any interested party who wishes to attend this public opening should contact the Procuring Entity as indicated in the Data Sheet. At the opening, the names of the Consultants, and the overall technical scores, including the breakdown by criterion, shall be read aloud. The Financial Proposals will then be inspected to confirm that they have remained sealed and unopened. These Financial Proposals shall be then opened, and the total prices read aloud and recorded. Copies of the record shall be sent to all Consultants who submitted Proposals.

24. Correction of Errors

- 24.1 Activities and items described in the Technical Proposal but not priced in the Financial Proposal, shall be assumed to be included in the prices of other activities or items, and no corrections are made to the Financial Proposal.
- 24.2 Time-Based Contracts-If a Time-Based contract form is included in the RFP, in case of discrepancy between (i) a partial amount(sub-total) and the total amount, or (ii)between the amount derived by multiplication of unit price with quantity and the total price, or (iii) between figures and words, the later will prevail. In case of discrepancy between the Technical and Financial Proposals in indicating quantities of input, the Technical Proposal prevails and the Procuring Entity's evaluation committee shall correct the quantification indicated in the Financial Proposal so as to make it consistent with that indicated in the Technical Proposal, apply the relevant unit price included in the Financial Proposal to the corrected quantity, and correct the total Proposal cost.
- 24.3 Lump-Sum Contracts - If a Lump-Sum contract form is included in the RFP, the Consultant is deemed to have included all prices in the Financial Proposal, so neither arithmetical correction nor price adjustments shall be made. The total price, net of taxes understood as per ITC 24 below, specified in the Financial Proposal (Form FIN-1) shall be considered as the offered price.

25. Taxes

- 25.1 Subject to ITC 24.2, all taxes are deemed to be included in the Consultant's financial proposal as separate items, and, therefore, considered in the evaluation.
- 25.2 All local identifiable taxes levied on the contract in voices (such as sales tax, VAT, excise tax, or any similar taxes or levies) and in come and withholding tax payable to Kenya on the remuneration of non-resident Experts for the services rendered in Kenya are dealt with in accordance with the instructions in the Data Sheet.

26. Conversion to Single Currency

- 26.1 For the evaluation purposes, prices shall be converted to a single currency using the selling rates of exchange, source and date indicated in the Data Sheet.

27. Abnormally Low Prices

- 27.1 An Abnormally Low Price is one where the financial price, in combination with other constituent elements of the proposal, appears unreasonably low to the extent that the price raises material concerns with the Procuring Entity as to the capability of the Consulting firm to perform the Contract for the offered price.
- 27.2 In the event of identification of a potentially Abnormally Low Price by the evaluation committee, the Procuring Entity shall seek written clarification from the firm, including a detailed price analyses of its price in relation to the subject matter of the contract, scope, delivery schedule, allocation of risk sand responsibilities and any other requirements of the RFP document.
- 27.3 After evaluation of the price analyses, if the Procuring Entity determines that the firm has failed to

demonstrate its capability to perform the contract for the offered price, the Procuring Entity shall reject the firm's proposal.

28. Abnormally High Prices

- 28.1 An abnormally high price is one where the proposal price, in combination with other constituent elements of the proposal, appears unreasonably too high to the extent that the Procuring Entity is concerned that it (the Procuring Entity) may not be getting value for money or it may be paying too high a price for the contract compared with market prices or that genuine competition between Consultants is compromised.
- 28.2 In case of an abnormally high tender price, the Procuring Entity shall make a survey of the market prices, check if the estimated cost of the contract is correct, and review the RFP to check if the specifications, TOR, scope of work and conditions of contract are contributory to the abnormally high proposals. The Procuring Entity may also seek written clarification from the Consultants on the reason or the high proposal price. The Procuring Entity shall proceed as follows:
- i) If the proposal price is abnormally high based on wrong estimated cost of the contract, the Procuring Entity may accept or not accept the proposal depending on the Procuring Entity's budget considerations.
 - ii) If specifications, TOR, scope of work and/or conditions of contract are contributory to the abnormally high proposal prices, the Procuring Entity shall reject all proposals and may re-invite for proposals for the contract based on revised estimates, specifications, TOR, scope of work and conditions of contract.
- 28.3 If the Procuring Entity determines that the Proposal Price is abnormally too high because genuine competition between Consultants is compromised (*often due to collusion, corruption or other manipulations*), the Procuring Entity shall reject all Proposals and shall institute or cause competent Government Agencies to institute an investigation on the cause of the compromise, before re-inviting for proposals.

29. Combined Quality and Cost Evaluation

a. Quality and Cost Based Selection (QCBS) Method

- 29.1 In the case of Quality and Cost Based Selection (QCBS), the total score is calculated by weighting the technical and financial scores and adding them as per the formula and instructions in the Data Sheet. The Consultant that achieves the highest combined technical and financial score will be notified and invited for negotiations.

b. Fixed Budget Selection (FBS) Method

- 29.2 In the case of FBS, those Proposals that exceed the budget indicated in ITC 14.1.4 of the Data Sheet shall be rejected. The Procuring Entity's evaluation committee will select the Consultant with the highest-ranked Technical Proposal that does not exceed the budget indicated in the RFP, notify and invite such Consultant to negotiate the Contract.

c. Least Cost Selection (LCS) Method

- 29.3 In the case of Least-Cost Selection (LCS), the Procuring Entity's evaluation committee may select the Consultant whose Proposal is the lowest evaluated total price among those Proposals that achieve the minimum technical score required to pass, notify the Consultant and invite the Consultant to negotiate the Contract.

d. Combined Technical and Evaluation Report

- 29.4 The evaluation committee shall prepare a combined technical and financial evaluation report, with specific recommendations for award or otherwise and subject to the required approvals within the Procuring Entity prior to notifications and invitation of Consultant for negotiations.

- 30.1 The Procuring Entity shall send to each Consultant (that has not already been notified that it has been unsuccessful) the Notification of Intention to Award the Contract to the successful Consultant. The **Notification of Intention to enter into a Contract / Notification of Award** shall contain, at a minimum,

the following information:

- i) The name and address of the Consultant with whom the Procuring Entity successfully negotiated a contract;

- iv) the expiry date of the Standstill Period, and
- v) instructions on how to request a debriefing and/or submit a complaint during the standstill period;

31. Standstill Period

- 31.1 The Standstill Period shall be the number of days stated in the Data Sheet. The Standstill Period commences the day after the date the Procuring Entity has transmitted to each Consultant (that has not already been notified that it has been unsuccessful) the Notification of Intention to Award the Contract. The Contract shall not be signed earlier than the expiry of the Standstill Period. This period shall be allowed for aggrieved Consultants to lodge an appeal. The procedure for appeal and the authority to determine the appeal or complaint is as indicated in the Data Sheet.

D. NEGOTIATIONS AND AWARD

32. Negotiations

- 32.2 The evaluation committee shall prepare minutes of negotiations that are signed by the Accounting Officer and the Consultant's authorized representative.

32.3 Availability of Key Experts

The invited Consultant shall confirm the availability of all Key Experts included in the Proposal as a prerequisite to the negotiations, or, if applicable, a replacement in accordance with ITC 12. Failure to confirm the Key Experts' availability may result in the rejection of the Consultant's Proposal and the Procuring Entity proceeding to negotiate the Contract with the next-ranked Consultant.

- 32.4 Notwithstanding the above, the substitution Key Experts at the negotiations may be considered if due solely to circumstances outside the reasonable control of and not foreseeable by the Consultant, including but not limited to death or medical incapacity. In such case, the Consultant shall offer a substitute Key Expert within the period of time specified in the letter of invitation to negotiate the Contract, who shall have equivalent or better qualifications and experience than the original candidate.

32.5 Technical negotiations

The technical negotiations include discussions of the Terms of Reference (TORs), the proposed methodology, the Procuring Entity's inputs, the special conditions of the Contract, and finalizing the "Description of Services" part of the Contract. These discussions shall not substantially alter the original scope of services under the TOR or the terms of the contract, lest the quality of the final product, its price, or the relevance of the initial evaluation be affected.

32.6 Financial negotiations

The financial negotiations include the clarification of the Consultant's tax liability in Kenya and how it should be reflected in the Contract. All applicable taxes shall be itemized separately and included in the contract price.

- 32.7 If the selection method included cost as a factor in the evaluation (that is QCBS, FBS, LCS), the unit rates and the total price stated in the Financial Proposal for a Lump-Sum contract shall not be negotiated.
- 32.8 Where QBS or CQS methods was used for a *Lump-sum Contract* as indicated in the RFP, the unit rates negotiations shall not take place, except when the offered Key Experts and Non-Key Experts' remuneration

rates are much higher than the typically charged rates by consultants in similar contracts or the professional practice. In such case, the Procuring Entity may ask for clarifications and, if the fees are very high, ask to change the rates. The format for (i) providing information on remuneration rates in the case of QB Sand CQS; and (ii) clarifying remuneration rates' structure under this Clause, is provided in Appendix A to the Financial Form FIN-3: Financial Negotiations – Breakdown of Remuneration Rates. If after the clarifications, the price is still considered too high, the Procuring Entity may terminate the negotiation and invite the next ranked Consultant to open its financial proposal and negotiate the contract.

32.9 In the case of a *Time- Based contract*, negotiation of unit rates shall not take place, except when the offered Key Experts and Non-Key Experts' remuneration rates are much higher than the typically charged rates by consultants in similar contracts. In such case, the Procuring Entity may ask for clarifications and, if the fees are very high, ask to change the rates. The format for (i) providing information on remuneration rates in the case of QBS and CQS; and (ii) clarifying remuneration rates' structure under this Clause, is provided in Appendix A to the Financial Form FIN-3: Financial Negotiations-Breakdown of Remuneration Rates. If after the clarifications, the price is still considered too high, the Procuring Entity may terminate the negotiation and invite the next ranked Consultant for negotiations.

32.10 Where SSS method was used as indicated in the RFP, both the unit rates and total price shall be negotiated. If the negotiations fail, the Procuring Entity shall terminate the Consultant selection process. In that event, the Procuring Entity shall review the consultancy requirements and market conditions prior to deciding to use an appropriate selection method to again procure the consulting services.

33. Conclusion of Negotiations

33.1 The negotiations are concluded with a review of the finalized draft Contract, which then shall be initialed by the Accounting Officer and the Consultant's authorized representative and minutes prepared to record the outcome of the negotiations.

33.2 If the negotiations fail, the Procuring Entity shall inform the Consultant in writing of all pending issues and disagreements and provide a final opportunity to the Consultant to respond. If disagreement persists, the Procuring Entity shall terminate the negotiations informing the Consultant of the reasons for doing so. The Procuring Entity will invite the next-ranked Consultant to negotiate a Contract. Once the Procuring Entity commences negotiations with the next-ranked Consultant, the Procuring Entity shall not reopen the earlier negotiations.

34. Letter of Award

34.1 Upon expiry of the Standstill Period, specified in ITC 28.1, after satisfactorily addressing any appeal that has been filed within the Standstill Period, and upon successful negotiations, the Procuring Entity shall send a Letter of Award to the successful Consultant. The letter shall confirm the Procuring Entity's award of Contract to the successful Consultant and requesting the Consultant to sign and return the draft negotiated Contract within Twenty-One (21) Days from the date of the Letter of Award.

6. FORM FIN 3D: BREAKDOWN OF REMUNERATION RATES [FOR TIME BASED CONTRACTS ONLY] – (NOT APPLICABLE)

1. Review of Remuneration Rates

- 1.1 The remuneration rates are made up of salary or abase fee, social costs, overheads, profit, and any premium or allowance that may be paid for assignments away from headquarters or a home office. Form FIN3 C can be used to provide a breakdown of rates.
- 1.2 The Form FIN 3C shall be completed and attached to the Financial Form-3. As agreed at the negotiations, breakdown sheets shall form part of the negotiated Contract and included in its Appendix D or C.
- 1.3 At the negotiations the firm shall be prepared to disclose its audited financial statements for the last three years, to substantiate its rates, and accept that its proposed rates and other financial matters are subject to scrutiny. The Procuring Entity is charged with the custody of government funds and is expected to exercise prudence in the expenditure of these funds.

2. Rate details are discussed below:

- (i) Salary is the gross regular cash salary or fee paid to the individual in the firm's home office. It shall not contain any premium for work away from headquarters or bonus, except where these are included bylaw or government regulations.
- (ii) Bonuses are normally paid out of profits. To avoid double counting, any bonuses shall not normally be included in the “Salary” and should be shown separately. Where the Consultant's accounting system is such that the percentages of social costs and overheads are based on total revenue, including bonuses, those percentages shall be adjusted downward accordingly. Where national policy requires that 13 months' pay be given for 12 months' work, the profit element need not be adjusted downward. Any discussions on bonuses shall be supported by audited documentation, which shall be treated as confidential.
- (iii) Social Charges are the costs of non-monetary benefits and may include, inter alia, social security (including pension, medical, and life insurance costs) and the cost of a paid sick and/or annual leave. In this regard, a paid leave during public holidays or an annual leave taken during an assignment if no Expert's replacement has been provided is not considered social charges.
- (iv) Cost of Leave The principles of calculating the cost of total days leave per annum as a percentage of basic salary is normally calculated as follows:
$$\text{Leave cost as percentage of salary} = \frac{\text{total days leave} \times 100}{[365 - w - \text{ph} - v - s]}$$
Where w = weekends, ph = public holidays, v = vacation, and s = sick leave.
Please note that leave can be considered as a social cost only if the Procuring Entity is not charged for the leave taken.
- (v) Overheads are the Consultant's business costs that are not directly related to the execution of the assignment and shall not be reimbursed as separate items under the Contract. Typical items are home office costs (non-billable time, time of senior Consultant's staff monitoring the project, rent of headquarters' office, support staff, research, staff training, marketing, etc.), the cost of Consultant's personnel not currently employed on revenue-earning projects, taxes on business activities, and business promotion costs. During negotiations, audited financial statements, certified as correct by an independent auditor and supporting the last three years' over heads, shall be available for discussion, together with detailed lists of items making up the overheads and the percentage by which each relates to basic salary. The Procuring Entity does not accept an add-on margin for social charges, overhead expenses, etc. for Experts who are not permanent employees of the Consultant. In such case, the Consultant shall be entitled only to administrative costs and a fee on the monthly payments charged for sub-contracted Experts.
- (vi) Profit is normally based on the sum of the Salary, Social costs, and Overheads. If any bonuses paid on a regular basis are listed, a corresponding reduction shall be made in the profit amount. Profit shall not be allowed on travel or any other reimbursable expenses.
- (vii) Away from Home Office Allowance or Premium or Subsistence Allowances Some Consultants pay allowances to Experts working away from headquarters or outside of the home office. Such allowances are calculated as a percentage of salary (or a fee) and shall not draw over heads or profit. Sometimes, by law, such allowances may draw social costs. In this case, the amount of this social cost shall still be

shown under social costs, with the net allowance shown separately.

7. FORM FIN - 4 BREAKDOWN OF REIMBURSABLE – (NOT APPLICABLE)

When used for Lump-Sum contract assignment, information to be provided in this Form shall only be used to demonstrate the basis for calculation of the Contract ceiling amount, to calculate applicable taxes at contract negotiations and, if needed, to establish payments to the Consultant for possible additional services requested by the Procuring Entity. This form shall not be used as a basis for payments under Lump-Sum contracts. This form shall be filled for Time-Based Contracts to form the basis of contract negotiations.

SECTION 5. TERMS OF REFERENCE

THE DESIGN, CONSTRUCTION, OPERATION AND MAINTENANCE OF WASTEWATER AND FAECAL SLUDGE TREATMENT PLANT IN THE COUNTY GOVERNMENT OF MOMBASA THROUGH JOINT VENTURE

1. INTRODUCTION

These Terms of Reference (ToR) outlines the project scope, objectives, deliverables, and responsibilities for designing and constructing a faecal sludge treatment plant at Mainland North of Mombasa County and renovation and revival of the Kizingo Wastewater Treatment Plant.

The objective is to create a functional, cost effective, efficient, and aesthetic Faecal and Wastewater Treatment Plants that meet the current and future liquid waste management needs of the County.

2. BACKGROUND

Mombasa County is in south-eastern Kenya, at around UTM Coordinates 37 S 574172 9553034. It borders the Indian Ocean to the east, Kilifi to the North and Kwale County to the South. It is the second largest city in Kenya. It covers about 230km² (land mass) and 65km² (inshore waters).

The County faces significant sanitation challenges, with outdated infrastructure and limited access to proper facilities, particularly in informal settlements. Health impacts, including the spread of waterborne diseases, underscore the urgency of addressing these issues. Approximately 60% of Mombasa's sewerage infrastructure, developed since the early 1950s, is over 60 years old and requires urgent rehabilitation. Initial developments included sewers in Changamwe (1952) and extensions to industrial areas and Magongo by 1957. The system later expanded to Mvita Constituency, with the now non-functional Kizingo Wastewater Treatment Plant, causing significant challenges in densely populated areas.

Currently, only about 16% of Mombasa's population is connected to the sewerage system, leaving many without proper wastewater management solutions. The North Mainland, including Nyali and Kisauni Constituencies, lacks public sewerage infrastructure, relying on on-site solutions and other primitive waste disposal methods.

3. WATER SUPPLY

Mombasa County is supplied by bulk water from four different sources; Baricho Wellfield, Mzima Springs, Marere Springs and Tiwi Aquifer. These ground water sources require minimal treatment after abstraction. Water is then conveyed to Mombasa and en-route towns and urban centres.

The Water Supply for Mombasa County is generally insufficient receiving 33,000m³/d and requires extension of the Source Works and Distribution Network to adequately serve the urban and peri-urban areas and cater for the future needs of the growing population.

4. CURRENT LEGAL AND POLICY FRAMEWORKS GOVERNING (FAECAL SLUDGE MANAGEMENT) FSM

Articles 21 (2) and 46 of the 2010 Constitution of Kenya Sanitation enacted in 2013 declared water and sanitation a basic human right, and devolved key water and sanitation functions to the county level. The current Ministry of Water, Sanitation and Irrigation was established by the Organization of the Government, Executive Order No. 1 of 2018(revised) issued in June 2018. This Ministry holds the mandate of developing legislation and policy documents that govern sanitation, among others. Kenya’s Vision 2030 endeavors to increase sewerage coverage 67.5% to 85%, and that of rural population from 52% to 76%. The sanitation and hygiene annual budget were to be increased to 0.5% of the annual Gross Domestic Product (GDP), to help combat inequalities in access to sanitation services (GoK, 2018). A summary of the most recent and relevant legislations, policies and development plans governing FSM at the national level are listed in the table below;

Legislation	Scope
Water Act 2002, 2016 (GoK, 2016)	Declares water and sanitation a basic human right to all Kenyans;
	Defines sanitation as provision of on-site sanitation services including latrines, septic tanks and conservancies including the associated exhauster services;
	Establishes institutions that govern service provision, Outlines roles, responsibilities and structures of institutions that govern service provision. These include the Water Works Development Agencies, Water Services Regulatory Authority, the Water Sector Trust Fund and the Water Service Providers.

<p>The Environmental Management and Coordination Act, 1999 (EMCA); Amended in 2015</p>	<p>The National Environment Management Authority (NEMA) was established through this act and tasked with the implementation of all policies relating to the environment. NEMA is also an oversight body, providing general supervision and coordination over all matters relating to the environment, including sanitation.</p>
	<p>The Act governs wastewater and sewage treatment plants, by regulating the effluent quality as per the fourth schedule for discharge into the environment and fifth schedule for discharge into public sewers.</p>
	<p>Section 72.(1) states that “Any person, who upon the coming into force of this Act, discharges or applies any poison, toxic, noxious or obstructing matter, radioactive waste or other pollutants or permits any person to dump or discharge such matter into the Aquatic environment in contravention of prescribed water pollution control standards shall be guilty of an offence and liable to imprisonment for a term not exceeding two years or to a fine not exceeding one million shillings or to both such imprisonment and fine.</p>
	<p>Section 72 (2) provides that a person found guilty under subsection (1) shall, in addition to any sentence or fine imposed on him:— (a) pay the cost of the removal of any poison, toxic, noxious or obstructing matter, radioactive waste or other pollutants, including the costs of restoration of the damaged environment, which may be incurred by a Government agency or organ in that respect; (b) pay third parties reparation, cost of restoration, restitution or compensation as may be determined by a court of law on application by such third parties.”</p>
	<p>Section 73 provides that all owners or operators of irrigation project schemes, sewerage systems, industrial production workshops or any other undertaking which may discharge effluents or other pollutants may be required from time to time to submit on demand, to the Authority accurate information about the quantity and quality of such effluent or other pollutant.</p>
<p>On effluents to be discharged only into sewerage system, section 74 (1) provides that every owner or operator of a trade or industrial undertaking shall discharge any effluents or other pollutants originating from the trade or</p>	

5. EXISTING PLANTS AND HANDLING CAPACITY

i. Kipevu Wastewater Treatment Plant

This Wastewater treatment works was established in 1952 with a capacity of 17,000m³/day. It was originally designed for biological filter plant and later rehabilitated and expanded to cater for an aeration treatment utilizing oxidation ditch system. The WWTP comprises of Inlet Works, Oxidation Ditches, Settling Tanks, Sludge Drying Beds and an Outfall Sewer. The areas covered by the sewerage system comprises of Miritni, Mikindani, Changamwe, Port Reitz, Chaani and EPZ area.

ii. Kizingo Wastewater Treatment Plant

The Treatment Plant at Kizingo was designed to provide only preliminary treatment (screening and grit removal) and primary treatment (sedimentation). The Inlet Works was designed for a Dry Weather Flow of 32,500 m³/day. Construction of the Sedimentation Tanks was phased and the initial installation has a settlement capacity for a Dry Weather Flow of only 3,000m³/day. The Treatment Plant has been out of

operation for many years. All the M & E equipment is missing (Jan 2015) and a by-pass arrangement directs discharge of sewage into the ocean through a 40m long outfall pipe at Ras Serani. The Outfall Pipe is broken at a point approximately 18m offshore and leakage at this point is visible.

6. OBJECTIVES OF THE ASSIGNMENT

The overall objective of the Project is to improve the socio-economic well-being and health standards of the residents of Mombasa County but specifically: -

- i. To increase sanitation coverage in Mombasa County by implementing wastewater treatment solutions
- ii. To improve public health and reduce environmental pollution through effective wastewater management
- iii. To promote sustainable and resilient urban development by providing equitable access to sanitation facilities
- iv. To create value addition towards waste treatment and management capitalizing on wastes as resources and sources of additional revenue.
- v. Strengthen the public and private sector capacity to better deliver and manage sanitation infrastructure and services.
- vi. To comply with legal and institutional frameworks addressing sanitation needs.

7. PROPOSED IMPLEMENTATION STRATEGY

The project will be implemented on a Joint Venture arrangement basis. The formation of the Joint Venture (JV) partnership is contemplated under Section 6 (5) as read together with Section 74 of the County Governments Act No. 17 of 2012, Laws of Kenya.

Private investors have the opportunity to enjoy relatively high returns expected from the project as the current prohibitive cost of land in Mombasa County will not hinder their participation. The relationship between the CGM and the Development Partner(s) shall be governed by a Joint Venture Agreement and Parties shall appoint an Independent Technical expert to monitor the implementation of each party's obligations under the partnership.

This being a fairly capital-intensive undertaking, the County plans to implement the Project through joint venture partnerships with private investors. The Investors will be expected to bring in the financing required to implement the project while the County Government will avail the land where the development will be undertaken. The County has designated land size of 27 acres located at Mwakirunge within which the plant

will be built. In addition, the investor will provide trucks that will be used to collect wastes from household and dispose to the plant.

The revenue sharing formulae will be agreed upon between the investor and the County upon successful negotiation process.

6. DELINEATION OF THE PROJECT AREAS

LOT 1: DESIGN, CONSTRUCTION, OPERATION AND MAINTENANCE OF FAECAL SLUDGE TREATMENT PLANT AT MOMBASA NORTH MAINLAND.

i. Population projections

North Mainland covers the entire Kisauni Division (Nyali and Kisauni Sub Counties) and is predominantly a residential area with several commercial shopping centres. Its coastal strip with sandy beaches is pre-dominantly occupied by hotels and tourist resorts.

The high income Nyali residential area which was originally planned for single dwelling houses is now undergoing major transformation to multi dwelling premises.

It has a total population of 508,507 (KNBS Census 2019) occupying a land area of 110.2 Km². The population dynamics were projected for a medium growth rate scenario totaling 526,085 people from the 2009 Projection.

According to Wastewater Master Plan for Mombasa Island and North Mainland, 2017, population growth rates and resulting projections is as summarized in the table below.

Design	2019-2020	2020-2025	2025-2030	2030-2035	2035-2040
Growth rate	4.00%	3.50%	3.00%	2.50%	2.50%
Population	528,848	628,106	728,148	829,879	938,932

Id	Sub-County	Zone (as per project)	Population			Land Area km ²	Density per/km ²

ii. Waste-water Flow rates and composition

The total wastewater generated within a service area is determined by the drainage area from the water consumed (sewage generation factor of 80%), infiltration into the sewers and splash flows. The projected wastewater generation for Mombasa Island and North Mainland are summarized in the Table below:

Area	Dry Weather Flow (DWF), m ³ /day				
	2009	2015	2020	2025	2040
North Mainland	36,912	43,825	50,600	58,453	90,348

The wastewater composition is summarized as below

Characteristic	BOD (mg/l)	COD (mg/l)	TSS (mg/l)
Quantity	663 – 18,675	2,062 - 55,328	1,120 - 50,200

LOT 2:

PROPOSED RENOVATION, REHABILITATION, REVIVAL AND OPERATIONALIZATION OF KIZINGO WASTEWATER TREATMENT PLANT AT MOMBASA ISLAND.

i. Mombasa Island Sewer Network

Mombasa Island piped sewerage scheme was built in 1962 to serve the densely populated area of Old Town and its rehabilitation and extension is ongoing. This was the first phase of a strategy to provide sewers to the whole Island. A small area of the Central Business District was included in this phase of the Sewerage Network. Four small pumping stations are located along the edge of the sewer area adjacent to the sea lift wastewater from local low areas into the Main Sewerage Collection System. A Tunnel links the sewer Network with the Kizingo Wastewater Treatment Plant, built in the South East corner of the Island at Ras Serani. A short sea outfall, about 40m long, discharges the effluent from the Treatment Plant into the Ocean.

The Old Town wastewater Collection system not including the main outfall Tunnel, has a total sewer network length of around 20 km, with pipe sizes varying in diameter from 150mm up to 600mm. The Major Collection Tunnel that connects the Old Town Sewerage network to the Kizingo Treatment plant has a cross-sectional area of 1.9m². The estimated capacity of the tunnel is 3m³/s and it was clearly designed to accept future wastewater flows from a large part the Island, not only the Old Town

ii. Kizingo WasteWater Treatment Plant

The Treatment works at Kizingo are located at coordinates -4.071607 39,677264 and it was designed to provide only preliminary (screening and grit removal) treatment and primary treatment (sedimentation). The inlet works were designed for a Dry Weather Flow of 32,000m³/day. Construction of the Sedimentation tanks was phased and the initial installation has a settlement capacity for a Dry Weather Flow of only 4100 m³/day. The Treatment Plant has been out of operation for many years. All the Electromechanical equipment are missing and the wastewater flows by by-pass and is discharged directly into the ocean through a 40m long outfall pipe at Ras Serani. The outfall pipe is broken at a point about 18m offshore and raw sewage can be seen discharging from the broken section of the pipe.

No treatment was provided to the sludge collected from the Sedimentation Tanks in the Kizingo Treatment Plant, instead, it was pumped directly into the ocean each day through the outfall pipe during periods when the tide was going out, so that it would be transported by the tide out to deep water for greater dilution.

iii. Mombasa Island Pumping Stations

The four pumping stations in the Island Sewerage System are located in the vicinity of the Old Mombasa Harbor on the Eastern side of the Island.

The pumping Station Buildings are all of similar design, with ground-level motors positioned vertically above Centrifugal pumps located in an underground dry well.

Wastewater from the incoming local gravity sewers fills an underground wet well at the Pumping Station, which provides a positive suction head to the dry well pumps. Two pump sets are installed in each station: one duty and one standby. The automatic operation of the pumping is controlled by float-level controls in the wet well. Upstream of the wet well, the wastewater passes through grit chambers and trash racks that are manually cleaned. There is an overflow pipe at each station in the event of power outages or pump breakdowns

Currently, none of the pumping stations is working as civil and electromechanical repairs are needed.

SCOPE OF WORK – LOT 2

- i. Undertake current review of the existing condition of the plant detailing the infrastructural, environmental and operational conditions
- ii. Identify and enumerate the plants shortfall in the current condition in operation as opposed to when its fully and efficiently operational.
- iii. Propose the best wastewater treatment plant renovation designs that can be undertaken to offer the best technology options, cost effective and environmentally friendly to serve residents of the Island.
- iv. Undertake Environmental Impact Assessment (EIA) on the proposed renovations, upgrades likely to be carried and recommend appropriate mitigation measures/plans to minimize any negative impacts during the actual works of the project.
- v. Prepare BOQs for cost estimates of undertaking the proposed renovations to ensure absolute revival. The cost estimates must clearly indicate the renovation assumptions, unit costs, and investment costs. The applicable rates should be the ones published by Joint Building Council at that period.
- vi. Propose the implementation schedule for the renovation of the Plant and entire works and submit for approval.
- vii. Carrying out actual execution of the rehabilitation of the plant.
- viii. Ensuring the materials used are approved materials and the construction equipment conform to agreed specifications and proposals;
- ix. The PIC team will conduct constant inspections of all works and working areas to ensure compliance to designs, drawings and materials used
- x. Prepare and submit monthly/quarterly reports on project progress of works, indicating construction progress and performance and the quality of work and the projected forecast on completion periods.
