

ADDENDUM:

CLARIFICATION ON THE CHANGE OF BID OPENING PROCEDURE AND BID SUBMISSION DATE.

Further to the President of Kenya's directives issued on Friday the 26th of March, 2021 on the escalation of the Covid 19 pandemic; it is important to note that we value the safety of our employees, bidders/representatives and customers at large. We therefore wish to bring to bidders' attention on the change of bid opening procedure and bid submission date as a mitigation plan on the prevention of a Covid-19 outbreak.

All bids should be delivered to the utility on or before the bid closing time, there will be **no gatherings or bidder representatives present** during the bid opening process.

The procedure for the virtual bid opening through video conferencing is as follows:

1. The zoom link, password and other details will be shared with the bidders who have registered with the Procuring Entity as interested bidders one day before the scheduled bid opening.
2. At the time of opening; the bid opening committee through their Chairperson will open the meeting and introduce themselves. The bidders/representatives will also be given an opportunity to introduce themselves.
3. After confirming seal, the bids will be opened and serialized one by one and the Bidders Name, Tender price, Bid Security together with its source and bid validity period will be clearly displayed, read aloud and recorded.
4. Once done, the chairperson of the bid opening committee will close the meeting.
5. Copies of the signed bid opening minutes will be shared with the stakeholders and the Bidders by COB the same day.
